

Welcome to SoCLib's development Trac

SoCLib Documentation

Installation, usage

- [Installation Notes](#) : how to install the SoCLib platform on your computer
- [Soclib Cc](#) is the current build system for SoCLib platforms

Components documentation

- [SoCLib Components General Index](#) : contains documentation about SoCLib components

Writing and design guides

- [General SoCLib Rules](#) : defines general rules regarding the SoCLib components.
- [CABA Writing Rules](#) : helps to write efficient CABA simulation models.
- [Critères Pour Plate-Forme TLM/T](#) : the criteria defined for writing TLM/T simulation models.
- [SoclibCc/DesignGuide](#) is an attempt to justify the choices made in soclib-cc

SoCLib project

You may find general purpose information on the [official project page](#).

You may follow contractual roadmaps on the [ANR/SoCLib project's Trac](#).
