

Welcome to SoCLib's development Trac

From here, you may follow **code development** of the ANR/SoCLib project.

Documentation / Design guides

- [Installation Notes](#)
- [Soclib Cc](#) is the current build system for SoCLib platforms
- [SoCLib components guide](#) should contain documentation about components
- [General SoCLib Rules](#) : defines general rules regarding the SoCLib components.
- [CABA Writing Rules](#) : helps to write efficient CABA simulation models.
- [SoclibCc/DesignGuide](#) is an attempt to justify the choices made in soclib-cc

SoCLib project

You may find general purpose information on the [official project page](#).

You may follow contractual roadmaps on the [ANR/SoCLib project's Trac](#).
