

Welcome to SoCLib's development Trac

1. A) SoCLib Library
2. B) SoCLib OS & Middleware
3. C) SoCLib Tools
4. D) SoCLib Resources
  1. Mailing list
  2. Installation, usage
  3. Writing and design guides
  4. Miscellaneous
5. E) Tutorials

## A) SoCLib Library

- SoCLib Components General Index : contains documentation about the hardware components (IP cores) available in the SoCLib library.

## B) SoCLib OS & Middleware

- MutekA : OS kernel for MPSoCs with support for POSIX threads
- MutekH : exo-kernel based OS kernel for MPSoCs with support for POSIX threads
- MutekS : Optimised, static OS for DSX
- MWMMR : Hardware / Software communication middleware

## C) SoCLib Tools

- DSX : Design Space Exploration tool
- SystemCASS : Fast SystemC simulation kernel
- SoCView : Interactive simulation environment for debug and instrumentation
- GdbServer : A GDB server for multi-processor architectures
- VCI Validation : A library for the validation of the VCI protocol (CABA and TLM-T versions)

## D) SoCLib Resources

### Mailing list

The dev@? Mailing list is public and targets general discussion about SoCLib component development.

To join the list, either

- send an email to dev-subscribe@?;
- see <http://www.soclib.fr/www/info/dev>.

### Installation, usage

- Installation Notes : how to install the SoCLib platform on your computer
- Soclib Cc is the current build system for SoCLib platforms
- Adding new components to the library : the rules to follow to add a new IP core to the library.

## Writing and design guides

- General SoCLib Rules : general rules regarding the SoCLib components.
- CABA Writing Rules : rules to write SystemC CABA simulation models.
- TLM-T Writing Rules : rules to write SystemC TLM-T simulation models.
- Processor Modeling : a general method to write generic processor models.
- Endianness considerations? : Endianness rules in SoCLib

## Miscellaneous

- Critères Pour Plate-Forme TLM-T : criteria defined for writing TLM-T simulation models.
- SoclibCc/DesignGuide is an attempt to justify the choices made in soclib-cc
- Models of documents? to be used by the project partners
- Frequently asked questions: When things goes wrong

## E) Tutorials

- ?DSX tutorial
- and OS tutorial
